CLAIRVOYANCE KIOSK

- **Easy to use Kiosk and Dashboard Appliance.**

- **Designed to work with the secure and reliable Niagara N4 Framework. Auto-login to any Niagara N4 site.**

- **Set it and forget it! Configure once and just watch your building!**

- **Have the data you want! Configure up to 8 different URLs and let the Kiosk continuously cycle through all URLs.**

DASHBOARDS SIMPLIFIED
Introducing the Clairvoyance Kiosk. A simple and easy dashboard appliance providing real time building insight. All the time.

NETWORK CONNECTION
Available with both wired and wireless network interfaces. You decide the type of network connection you want.

PROVEN TECHNOLOGY
Uses reliable and tested technology based on the popular Raspberry Pi 4 and Debian OS. For more hardware information, visit pip.raspberrypi.com. For Operating Software (OS) information, visit Debian.org

While buildings are generating large amounts of data, users of that data seem to remain unsatisfied. The data may be hard to get, dated, poorly presented, or just not available where it is needed. Providing additional computers to drive multiple dashboards is both time consuming and expensive. A simple power blip creates the need for personnel (often untrained) to reboot and login to a server. The Clairvoyance Kiosk is designed to address all of these challenges and more. Eliminate the nuisance calls from monitoring teams, security personnel, or maintenance staff.

The building lobby is becoming a choice location to advertise the performance of the building - the fruit of careful investments. Providing a TV monitor at the security desk or in a high-traffic area will keep tenants and staff aware of key building information. In the building engineer's office, the kiosk can help monitor a variety of systems like the chiller plant, or selected equipment, turning the technical office into a true control center. And in the executive suite, the device keeps management in the know, bringing key metrics to the building or portfolio manager.

CLAIRVOYANCE KIOSK

ZERO DOWNTIME

No longer do you need to expend any effort to reboot computers, remember user names, passwords, or remember IP addresses. Set it once and forget it. The Kiosk automatically reconnects on power up and resumes operation.

TURNKEY SOLUTIONS

A simplified appliance combines both hardware and software with a simple straightforward GUI into a small form factor providing an easy to use dashboard appliance.

Features and Technical Specifications

The Clairvoyance Kiosk is a palm-sized device that connects to a monitor or TV screen, a power source, and your network. Configure up to 8 sites/URLs. Niagara 4 sites will require associated usernames and passwords. Non-Niagara URLs can be configured, (no auto-login). The kiosk will cycle through all configured URLs, displaying your choices.

Choose how long each URL is displayed, and select "auto-start" if you want the system to resume the sequence on every power-up.

- **Dimensions:** 3.66" x 2.6" x 1.1" (93mm x 66mm x 28mm)
- **Weight:** 0.3 lbs (4.7oz)
- **Power Requirement:** 5V DC via USB-C connector (minimum 3A)
- **TV/Monitor Connection:** 2 x micro-HDMI ports (kiosk supports 1)
- **Ethernet:** 1 x RJ-45 port (Gigabit)
- **Wi-Fi:** 2.4 GHz and 5.0 GHz IEEE 802.11ac wireless
- **USB:** 2 x USB 2.0 ports, 2 x USB 3.0 ports (for input devices only)
- **Operating Temperature:** 32 - 120°F (0 – 50°C)
- **Operating System:** Debian GNU/Linux
- **Configurability:** User interface accessible on startup
- **Max number of screen views (URLs):** 8
- **Supported Auto-login content:** Niagara N4

Available Models

Model #	Connection Type	Device Type	Min Number of URLs	Max Number of URLs
